

## Data Sheet

# PMMA / Acrylic (X522HT)

## Alternative Designations

---

-

## Key Features

---

High processability • Clear appearance • Heat resistant up to 100°C

## Description

---

This material is a clear urethane resin developed to manufacture high-end transparent products. It is suitable for vacuum casting in silicone mould. PMMA / Acrylic (X522HT) is developed by the mixture of 3 different components 2 Polyols and 1 Isocyanate.

## Mechanical Properties

---

Hardness (Shore D)

87

## Thermal Properties

---

Softening temperature

100°C
